Blogs

[SVG Animation using Tailwindcss](#)

[Create better reusable components for your Tailwind design system](#)

I possess extensive expertise in high-end frontend development, utilizing React, Tailwind CSS, and TypeScript to craft exceptional user experiences. I have a deep passion for problem-solving and open source software. I have also won multiple top-tier hackathons like EthForAll.

EXPERIENCE

MMM Workstream (Gitcoin)

February 2022 - July 2022

- Contributed to the Gitcoin Workstream website, ensuring smooth functionality and an exceptional user experience.
- Revamped the website's visual appeal with a captivating masonry-style layout, enhancing browsing and navigation.
- Elevated the overall style and coherence of the website, delivering a seamless and polished user interface.
- Streamlined the user experience with a cutting-edge modal component, optimizing functionality and interaction.
- Collaborated closely with team members, fostering a dynamic and productive work environment.

Calibir

June 2022 - September 2022

- Crafted the entire Calibir website from scratch, delivering a stunningly modern and highly functional design that perfectly met the client's needs.
- Infused an irresistible charm into the user experience by skillfully integrating an animated section powered by the dynamic GSAP animation library.
- Engineered a blazing-fast, ultra-responsive, and universally accessible website that flawlessly embodied the client's branding and messaging.
- Ignited a spark of delight among users, immersing them in a captivating journey while seamlessly navigating the website's wonders.

PROJECTS

Vykt

ETHForAll - Feb 2023

- Developed the profile selector feature for Vykt, offering users the ability to choose visually appealing images for their wallet profiles.
- Collaborated closely with the team to integrate the Lexica API, enhancing the range and quality of available profile pictures.
- Implemented wallet interaction functionality to streamline user experience and improve usability.
- Contributed to the team's success by winning the developer tooling track in the renowned EthforAll hackathon for Mantle chain.
